

TI-FORCE SYSTEM

GSX-R1000 REARSETS  
TOOBEE CO.LTD

## Development Concept

- Use the design that has the best function. The edge is R-shaped to give the rider the most manoeuvrability.
- Superb adjustability aimed to allow every rider to meet their full potential.
- The JERARUMIN material for both strength and weight saving.
- ALMITE-treated surface for textured feel and toughness.

## Strong Point 1: Adjustable position function

The riding position can be adjusted in increments of 10mm, to best suit the rider's body shape and style of racing.

## Strong Point 2: Adjustable shift stroke

The attachment of the shift-rod gives a choice of three set-up points, to achieve adjustability of gear select stroke.

### Strong Point 3: Adjustable pedal-end bar

- There are two attaching points for the pedal-end, to best suit the rider's foot size.

## Strong Point 4: Ball bearing

Two ball-bearings are fitted at the shift-pedal-pivot point, for smooth movement and excellent durability.

**TI-FORCE**®

## Strong Point 5: Heel guard at both sides

- A heel guard with a sharp feel but overall soft styling provides secure control and safety.
- A TI-FORCE logo

**F**ITNESS **FORCE**®
